What other thoughts might influence their behavior?

India is the second largest producer of wheat and rice, the World major food staples

The history of agriculture in India dates back to the Neolithic period.

It provides
employment
opportunities to the
rural agricultural as
well as non
agricultural labours

Agriculture growth as been fairly volatile over the past decade, ranging from 5.8% in 2005-2006 to 0.4% in 2009-2010 and -0.2% in 2014-2015.

The Agriculture sector employes nearly half of the workforce in the country. However it contributes to 17.5% of the GDP (at current prices in 2015-16)

A way of grouping countinuous data into discrete categories are bins in tableau

INDIA'S
AGRICULTURAL
CROP
PRODUCTION
1997-2021

It ensures the country food security and produce a variety of industrial raw materials.

Agiculture is the main source of income for major part of our country's population.

It provides food, raw material for industries and product for export.

Indian agriculture
began by 9000 BCE
on North-West India
with the early
cultivation of plants
and domestication of
crops and animals.

Agriculture is the mainstay of Indian economy because about 60% of our population depends directly or indirectly on agriculture.
